20.1 - Email Template - Simple text .....	104
20.2 - Email Template - Print label .....	106
Appendix .....	108
The End.....	109

## 01.0 – Introduction

This document should be treated as the definitive specification for UX requirements for web returns. It supersedes all other versions and other sources of information referred to in the document.

We have tried to keep the journey simple whilst balancing the ease of use for customers with House of Fraser's returns policy and the implementation for mobile and desktop. Invariably in addressing each requirement in turn it increased the level of complexity, but on the whole the solution remains simplistic yet scalable and portable.

Whilst we have attempted to address every use, case there are undoubtedly scenarios which we may have missed or have not manage to document in this iteration. One example is that we would have liked to specify an enriched experience for tablet and PC users to utilise AJAX to refresh DOM elements, but chose to rely on server-side logic to reload the page. This keeps the code lighter and simplifies the solution for the M-Site whilst providing a perfectly acceptable experience for users of desktop and tablet.

In attempting to streamline the development phase we have, wherever possible, reused UI patterns introduced in the build of checkout. To accompany this document we have compiled an annotated pattern library with code snippets for reference (this is a living document which will evolve over time) and HTML prototypes to show sample coding and high-fidelity presentation of the UI.

### Included in this document

- Overriding principles of user experience for House of Fraser
- Flow diagram of the simple journey
- Annotated wireframes depicting desired layout, styles and interaction for:
  - default states for the common journey;
  - alternate states and exceptions; and
  - Feedback messaging including error handling.

### Accompanying documentation

- Detailed flow diagram of the customer journey showing logic in accordance with our returns policy <http://hofprod.fastnet.co.uk/test/returns/web-returns-user-journey-FINAL.pdf>
- UX Style Guide & UI pattern library <http://wiki.hof.co.uk/display/HOFSG/Style+Guide+-+UX>
- HTML prototypes <http://hofprod.fastnet.co.uk/test/returns/>
- Copy and messaging have been added to the wireframes

### Missing details

- Documentation and wireframes for M-Site
- Detailed use cases for all scenarios
- Refunding of original tender, eVouchers and rewards
- Detailed high-fidelity designs

## **How to use this document**

In addition to referring to the contents during build, we recommend that you print out the wireframes and stick them on a wall so that you can more easily follow the entire journey together with annotations and different states.

Content asset IDs will be in the following format: <PageName>\_<label>\_<location>

## **Contacts**

Should you have any queries, please contact the following people:

- For UX journey queries  
Shebul Miah, UX Architect, House of Fraser
- For UI pattern library or client-side code  
Sivatharashini Thirchelvam, Web Developer, House of Fraser

For either of the above  
Martin White, Senior UX Manager, House of Fraser

## 02.0 - Change Log

## 03.0 - Principles of User Experience for House of Fraser

### Style Guide - UX Objectives

We want to provide engaging, entertaining and enriched experiences which treat every customer like a VIP. We'll help them access our products and services however or whenever they choose and encourage their repeat custom. These are the fundamental objectives for any project...

1. Our interfaces should be fast loading, elegant, enticing and easy to use to reflect the contemporary and premium nature of our brand.
2. Our approach should be "mobile first". We want to build scalable, extensible and responsive solutions which optimise the display of content for the available retail estate and the appropriateness of each channel.
3. Our foundation to development is to adhere to web standards and utilise design patterns, components and object orientated CSS wherever possible.
4. Our solutions should consider how we maintain them so that manual administration is kept to a minimum.
5. Our designs are progressive and enrich customer experiences without impeding their main objective for visiting House of Fraser.

### Requirements

- Utilise patterns and components ensuring consistency through customers' journeys.
- Separate layout (HTML) from presentation (CSS) and enrichment (JavaScript/Plugins).
- Ensure interfaces are optimised for speed of download and adhere to Yahoo's [performance recommendations](#).
- Mark up should be valid, standards compliant HTML5 using semantic tags optimising accessibility and SEO.
- Minimize duplication of code in HTML and CSS by reusing styles, components and animation consistently.
- Our channels should be accessible and our website, in particular, needs to meet certain standards to comply with the [Equality Act](#) which came into force in October 2010 in England, Scotland and Wales. We should [comply with the RNIB](#) who advise: *"we recommend that websites exceed the basic level of compliance that the World Wide Web Consortium (W3C) recommend in their Website Content Accessibility Guidelines (WCAG) version 1.0 and aim for Double AA compliance."*
  - RNIB - [Laws and standards for websites](#)
  - WebAIM - [Creating accessible JavaScript](#)
- Use interaction that we get for free from HTML & CSS so that we keep solutions light-weight and simple. Examples include clickable labels for checkboxes and radio buttons; and using title attributes on links and in abbreviation tags.
- Where appropriate, progressively enhance user interfaces by utilising code and techniques in HTML5 and CSS3 which enhance user experience and degrade gracefully for legacy browsers.

## 04.0 - Amended Returns/Replacement ROI

### Web Returns & Exchanges - Potential Revenue Benefits

See attached sheets for more details on the benefits summarised below  
 Numbers below are based on actual sales for 11/12 (£100m) rather than plan for 12/13 (£160m)  
 Two scenarios prepared to demonstrate sensitivity of proposals  
 Incremental profit based on a 20% margin (GP less fulfilment & transactional costs)

#### Incremental Benefits

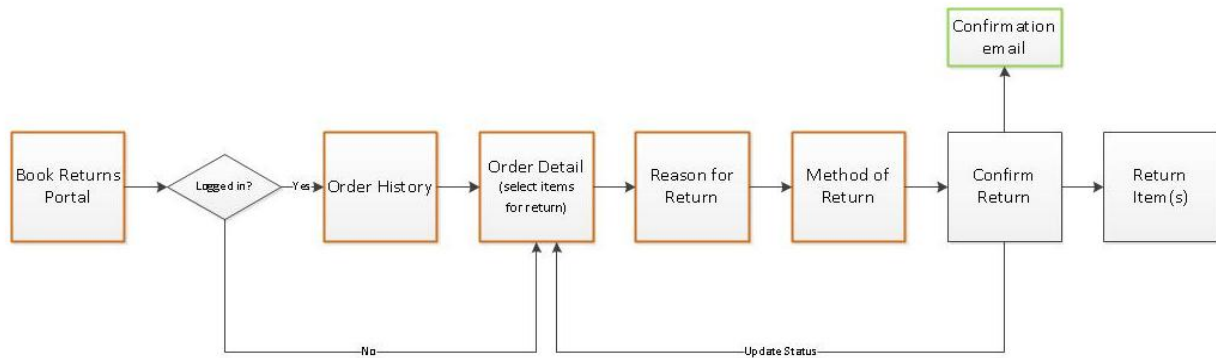

Incremental Benefits	Sales		Background	% of Max Potential		Finance Comments
	Finance View	Ecomm View		Finance View	Ecomm View	
Nature Of Opportunity						
Exchanges & Part Refunds						
Items that could be exchanged (wrong item / damaged)	127,786	638,929	4.7% of returns fit into this category	10%	50%	Assumes customer will pay for this service & therefore a niche group of customers only
Items that "did not fit"	0	0	38.9% of returns fit into this category	1%	10%	Assuming large percentage of those returning have bought at least 2 sizes in the same outfit
Add on Sales from those customers exchanging	0	0		0%	5%	Very subjective
Online Returns Booking						
Reduction in Lost Returns out of Policy	400,000	800,000		40%	80%	All returns via call centre or online, no longer will a returns label be provided, should be an opportunity to over achieve
Reduction in Lost Returns	0	140,000		0%	80%	No detailed information available, this change may only help understand lost returns rather than generate income
Sales Benefit	527,786	1,578,929				
Contribution	87,964	263,155				
Budgeted Savings Requiring Project Implementation						
Reduction in Call Centre Volume	150,000	150,000				
EDC Productivity Improvements	150,000	150,000				
	300,000	300,000				
	387,964	563,155				

#### Other

Exchange service is proposed to be premium & that the customer pays for it, however if not funded by customer premium courier costs could be significant

## 10.0 - Book Returns

The wireframe illustrates the layout of the 'Book Returns' page. It includes a 'Secure Site Header' at the top, followed by a breadcrumb trail: 'Homepage > Customer Services > Returns & Refunds > Book Returns'. The main heading is 'Book Returns'. A red error message box contains the text '<Whoops, we have a problem! Please try again later>'. Below this, a dashed red box highlights a section for registered users, containing the text 'Registered when you bought? You can skip this step and return items via your [Order History](#)'. This section includes a form for an 'Order number' (with a hint: '<8 digits located on your despatch note or order confirmation email>') and a 'Next' button. A large placeholder for a 'despatch image' is shown with a red circle indicating 'Where to find your order number'. To the right of the form are two content blocks, 'Content Block #1' and 'Content Block #2'. The page concludes with a 'Secure Site Footer'.

Footnote	Label	Description	Interaction	Display Rules
1	Book returns page	Display book returns page		
2	Display page heading	Display book returns heading, H1.  Approved copy: Book Returns		
3	Failure message	Display failure message, if the service has failed or the page has timed out. Copy TBC.		If a guest user typed in correct order number and Return Reference ID but line item status was not retrieved on the order details page, bring the user back to this page and display failure message.
4	Error message	Approved copy: Whoops, we have a problem! Please try again later.		
5	content asset			The copy and link are one content asset. Only shown to logged in customer and when they arrive on this page.

Footnote	Label	Description	Interaction	Display Rules
6	despatch image	Display despatch image showing the user where to find order number.		
7	Registered user message	Display registered user message		If the user is an account holder and logged in display this message.  If the user is a guest remove this message.
8	Order history link	Display order history link	Click:  If the user is already logged in direct the user to the order history page.

## 16.0 - Reason for Return Page, 1 SKU A (Default State)

The wireframe illustrates the 'Reason for Return' page layout. At the top is a 'Secure Site Header'. Below it is a progress bar with five steps: 1. Order Details (active), 2. Reason for Return, 3. Method of Return, 4. Confirm Return, and 5. Return Items. The main content area is titled 'Reason for Return' and contains a form with the following elements:

- A heading: 'Please tell us why you are returning your <1> item(s)'.
- A red dashed box containing a placeholder for the 'SKU Image' and a list of item details: '<Brand Name>', '<Product title>', 'Product code - <155883006>', '<Attribute> - <Value>', and '<Attribute> - <Value>'.
- A label '\* Required information'.
- A dropdown menu labeled 'Reason for return \*' with the text 'Select Reason'.
- A 'Continue' button.

To the right of the form are two large rectangular content blocks labeled 'Content Block #1' and 'Content Block #2'. At the bottom is a 'Secure Site Footer'.

Footnote	Label	Description	Interaction	Display Rules
1	Order Details tab	Approved copy: Order Detail	Click: Link back to original order details page. Does not remember return booking information.	
2	OnState	Display reason for return OnState when the user is on the reason for return page. Approved copy: Reason for Return		See UI pattern library for design and functionality
3	OffState	Approved copy: Method of Return		Display this type of look and feel for future states.  See UI pattern library for design and functionality
4	Confirm Return	Approved copy: Confirm Return		
5	Progress tracker	Approved copy: Return Items		

Footnote	Label	Description	Interaction	Display Rules
6	Reason for return title	Display reason for return title.  Approved copy: Reason for Return		
7	Book return module	Display book return module		
8	Items to return label	Display items to return label. Numbers in brackets <> denote dynamic text.  Approved copy: Please tell us why you are returning your <1> item(s)		Replace the number in brackets with the number of SKU's to be returned.  If there is only 1 item remove the letter s.
9	* Required information	Display * Required information text when inputs are mandatory.  Approved copy: * Required information		
10	Basket functionality	Display SKU detail chosen for return		See prototype
11	Select reason for return label	Display reason for return label.  Approved copy: Reason for return *		
12	Reason drop down list	Display reason drop down list. Onselect display the reasons as mentioned on the 'Truth table'.	1. Click: Show drop down list  2. OnClick select reason	Show 'Select Reason' option as default. This is a mandatory field and must be chosen. OnLoad show the first drop down list with AutoFocus style (use HTML5 attribute).  Make the length of the drop down list the same length as the longest sentence.
13	Continue button	Display continue button.  Approved button label: Continue	Disabled: If no reason has been chosen from drop down list.  Enabled: If a valid reason has been chosen from drop down list.  OnFocus: If enabled go to Method of Return State A (Default State)	Style this button so it looks like the primary action.
